

FENSTERMACHER EMAIL TO ME PROVING HE IS LYING

Fenstermacher sent me this email in January 2025. He basically never responds to emails from anybody because he just doesn't feel like it. What a child. He claims he did not know why my Mother's diamond engagement ring of 80 years was taken off of her finger. It was done so by jsh for unknown reasons. But, he says in a later email to me that he told jsh to do it because the ring was the property of the estate. BS!. Mother's platinum wedding ring was left on by jsh. Fenstermacher claims he had a jeweler appraise the ring and it was worth only \$350. How can he or jsh deny my Mother her engagement ring to wear forever? The estate is worth about \$1.5 million!

Jsh is a proven monster. She buried her mother in a pajama top and sweat pants and not the nice clothes Mother wanted to be buried in and changed the coffin Mother picked out years ago and put her in a coffin about \$1,000 cheaper.

Re: ring estimate, loan payback, buying house

Arthur,

These questions have already been answered.

I am not going to do anything with the house until an accounting has been fully adjudicated by the Orphans' Court.

The ring was appraised by a well known jeweler. I would not give the ring to you; I don't trust that you would return it.

Given that the Gift Tax Return was provided by the accountants who prepared it, I am satisfied that your mother gifted the balance of the loan to Jill. Since it was a gift, there would be no canceled checks - that should be obvious. You are of course free to raise that issue with the Court when the accounting is filed.

➔ As I have told you many, many times already, I know nothing about why the ring was removed from your mother's finger.
