

JASKO RAT HAD NO IDEA ABOUT MOTHER'S SERIOUS LEG PROBLEM

On November 19 2021, I had to send jasko rat a email telling him Mother's very swollen legs were not being taken care of.

The mafia had always refused to get Mother her own phone in her room so she could contact her owners if she had problems. Logie, after he had Mother kidnapped by jsh, discontinued Mother's medical alert necklace so she could call for help if she needed it, in case she fell, heart attack, etc. The staff were always in the TV room watching TV or talking on their cell phones.

Worthless and useless owners.

As you know, I am now pro se. I sent emails to both Jaskowski and Logic yesterday telling them my mother's legs are swollen, red and painful since Tuesday. As of today at noon, they still are. She must go to the hospital for a MRI to be sure there are no clots or other problems that could harm or kill her. I left a message about my mother's legs to the director.

As you know, I still not received repayment of \$260 for my mother's temporary glasses, she still has not gone to her actual eye doctor to be sure the glasses are correct, she has missed several doctor's appointments and I have not received the \$2,000 that my mother has given to us each year for birthday & Easter and later \$10,000 for Christmas.
