

More corruption by lawyer jaskowiak and guardian of estate lawyer fenstermacher

From the beginning of the guardianship scam on Mother, starting when she was 96 and only stopped after the mafia killed her with morphine on July 2 2024 at a low rated nursing home, The mafia knew I was on mothers side and would not steal from her. I tried for 3 years to get her back to her huge home of 21 years that she loved and her much loved possessions of almost 100 years. I was the enemy of this guardian mafia.

Jaskowiak and fenstermacher had me evicted me from Mother's home on August 23 2023. My Mother and I had always had a very close and loving relationship. She had asked me to live with her to keep her company, even though we saw each other every day for dinner. When the scam started on mother, I had been living there for 2 years. She had put it in writing that she always wanted me to live with her, even if she was not living there with her. But, the mafia refused to ask mother what she wanted and evicted me. Weilheimer even made a order that forbid me from telling my my I had been evicted from her home and was forced to live in my car, summer and winter.

On June 10 2024, I discovered that jaskowiak and fenstermacher were sending time sensitive documents that needed to be answered to my Mother's house where they both knew they had me evicted from about a year earlier.

I sent both of them this email telling them I knew they were trying to fix petitions their way because they were not sending me petitions to my correct address to respond to. That is called corruption.

Jaskowiak, Fenstermacher,

I saw on a recent guardian report you both have my mother's address still listed for mailings to me. I have found items posted in the court docket only because I had them downloaded at the register of wills. Sometimes you do send documents to my Quakertown address. Both of you have known my Quakertown address since you both evicted me from my Mother's house and denying me her gift money without consulting her in august 2023 as retaliation by me continuing to expose this guardianship scam on her for her money. Was your game trying to deny me the ability to respond to those documents by not having me see them?

I am constantly amazed how low shysters will go for a dollar. Stealing from a now 99 year old woman? Really?
